

Supply Chain Management Summer School

July 4 – July 15, 2016
in Munich, Germany
Including Company Tour
by Bus and Field Trips

The mixture of academic lectures and company visits makes this summer school unique! Students will learn about the challenges in the field of supply chain management in theory and practice at first hand from university professors and the responsible managers in the companies visited.

Operational Excellence – Managing Global Supply Chains the German Way

The program offers three courses: The *Future Supply Chain Management* course focuses on the challenges facing the currently successful German supply chains in the years to come. The *German Way of Operational Excellence* course focuses on established and proven methods of German companies in a global context. In the *Doing Business in Germany* course you will learn about economic history as well as Germany's economy today. In the first week companies located in the Munich area will be visited, in the second week a 4-day tour will take us to several leading companies in their field.

Courses

- Future Supply Chain Management
- Operational Excellence – The German Way
- Doing Business in Germany
- 4-day Company Tour by Bus
